Projects

Drink and Dine | https://github.com/moonlagoon/Drink-and-Dine | https://moonlagoon.github.io/Drink-and-Dine/

Role: UX / UI designer

Single-page web app for food and drink recipes. Input one ingredient to review several recipes for quick ideas with what you have in your pantry and fridge.

- Takes one recipe you input and gives your various recipes for both food and drink.
- Utilizes Bootstrap, API, Firebase, and Jquery queries to create a live search and filter feature.
- Integrates food and drink API as an interactive component that functions as an ingredient-based filter.

Night Beat | https://github.com/moonlagoon/nightbeat | https://agile-sands-50441.herokuapp.com/

Role: React Developer / Designer

Third party sales Sneaker-bot application which enables users to purchase limited brand sneakers at the earliest release before they sell out.

- Log into your profile through authentication feature Passport to get started.
- Utilizes Reactstrap, Express, API, axios, and bcryptjs to create a live search and filter feature.
- Uses Sequelize and to store all data into database for the web application.
